RE: Docket # 2014-69-s

April 17, 2014

Dear Mr. Melcher;

I am sending this as an official request to deny "Palmetto Wastewater Reclamation LLC" the request to combine and increase rates for the "Alpine" utility.

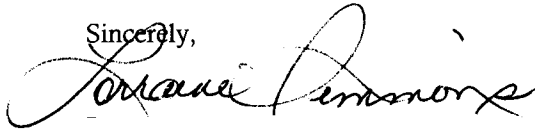

Last year they claimed to raise rates because of repair costs, etc. that took us from around 25.00 to 29.00. Math a little fuzzy but seems like about 7.25% or so while "Woodland" received **NO INCREASE**. Now they say they need to make improvements to "Woodland" this year. By combining the two units that allows them to charge us for "Woodland" repairs.....totally unfair that we should get a double increase and foot the bill for the other unit when they did not share in the cost for "Alpine" repairs.

I feel this is a calculated move for this company to get a double increase.

I would rather recommend that should they get the increase at all, that "Woodland" incur that entire cost for their repairs as we did last year. If they still need to combine units, take it back to the board in 2015. That would only be the fairest way to serve the customers of the "Alpine" unit. I know our community has also done a petition.

I thank you in advance for your attention and consideration in this matter. If you are not the person to whom I should be addressing this to, please forward to the proper department or persons. Thank you again.

Sincerely,
